

**Funded by Smart & Skills – Training Needs Identification (TNI) funding**  
**NO COURSE FEE for NSW Students – fully government funded**

### **Competency unit: HLTINFCOV001 Comply with infection prevention and control policies and procedures.**

NSW Smart & Skilled funding is available under the Training Needs Identification (TNI) funding program. Whilst funding cannot be 100% guaranteed; Training Services NSW will consider all reasonable applications with current turnaround times between 2-5 days.

TNI funding applications can be applied requested for corporate organisations or groups of individuals.

#### **How the course is delivered.**

The course is delivered fully online with a workplace assessment component. People completing this Course MUST either be working or able to demonstrate their skills in the workplace for a minimum of 3-5 days. The workplace assessment component is completed using a combination of online video uploads and remote observation using an appropriate mobile app such as Messenger or Facetime.

With easing social distancing restrictions, this course can be delivered to small groups (8-12 persons) either online or in a classroom with appropriate control over social distancing and workplace hygiene requirements.

A summary course outlined of the Learning Materials is as follows:

- Section (1) Role of cleaning in controlling infections
- Section (2) Infection Control and the Environment
- Section (3) Infection prevention and control
- Section (4) Chemicals and Equipment
- Section (6) The Cleaning Schedule (Risk Based Approach)
- Section (7) Sample cleaning procedures
- Section (8) Handle and Dispose of Clinical Waste
- Section (9) Maintain and Store Cleaning Equipment

**About Daniels Associates:** We are the most respected provider of cleaning industry training over the last 16 years. We provide course content to the Cleaning Association (BSCAA) and may large organisations and government departments.

### **COVID-19 Pandemic response**

On 12 May 2020 a suite of infection control training products was released for a new unit of competency HLTINFCOV001 Comply with infection prevention and control policies and procedures.

This competency unit was developed to provide an immediate response to the need for infection control training in the retail, food handling and transport sectors with the COVID-19 pandemic.

The cleaning industry provides vital services in the retail and other sectors. As a broad overview staff working in most cleaning roles would be considered a retail environment.

This competency unit has been specifically contextualised for the cleaning industry and appropriate retail environmental considerations.
